

Fuel Monitoring Presentation

Fuel Monitoring

We specialize in fuel monitoring also can customize any tracking product:

We provides fuel monitoring comprehensive solutions for **Vehicles and Generators with very comprehensive reports:**

Offering products and solution based on modern GPS+ GPRS and GSM technologies for "Fuel Monitoring":

(Fuel Consumption Monitoring, Fueling, Draining, Fuel History);

- prevents fraud of fuel;
- prevents unauthorized use of fuel;
- provides high-precision measurement of fuel level in a fuel tank;
- gives detailed information about fuel tank fueling and draining;
- gives detailed information about fuel consumption;
- collects and stores information about fuel in tank for detailed analyzing;
- gives detailed fuel usage history.

Key Features

- Real time fuel level monitoring.
- Fuel filling and poring report with time and date.
- Distance status.
- Fuel consumption rate / repots.
- Fueling control gives user of GPS tracking system to monitor where, when and how much fuel was filled into the tank; it avoids the manipulation of fuel and, consequently, reduces the operating costs of transport.

Fuel Monitoring

Using imported sensors from Taiwan, industry best fuel sensors which provides accuracy results.

- To obtain reliable information about current fuel volume in vehicle tank.
- To define the vehicle fueling volume.
- To detect fuel theft from the tank.
- To carry out the remote tank monitoring.
- To determine fuel consumption.

Real-time Tracking
